

↳ LRU cache $\rightarrow \underline{O(1)}$

↳ least frequency used.

↳ size = 2

put(1, 10) ✓

put(2, 20) ✓

get(1) $\rightarrow 10$

put(3, 30) $\rightarrow$ del L.R.U

get(2) $\rightarrow -1$

get(3) $\rightarrow 30$

put(4, 4) $\rightarrow$ tie

get(1) $\rightarrow -1$

get(3) $\rightarrow 30$

get(4)

get(key) $\rightarrow$ gets the value of

key if exists,

else -1.

put(key, value)

↳ updates the value of

key if present, or

inserts key if it

is not present.

↳ when the cache is

full, it removes the

LFU one. If tie, then

the last of them.
